Professional Summary

B.Tech Information Technology student with strong interest in Artificial Intelligence, IoT, and Applied Research. Experienced in machine learning, NLP, and IoT-based system development, with a published research paper at an international Springer conference (SmartCom 2026). Passionate about solving real-world problems through research-driven approaches.

Education

Charotar University of Science & Technology (CHARUSAT)

Jul 2024 – May 2028

Bachelor of Technology in Information Technology

CGPA: 7.6 / 10

Relevant Coursework: Data Structures, Algorithms, OOP, DBMS, Machine Learning (Self-learning)

Publications

IoT-Driven RFID-Based Real-Time Attendance System

10th International Conference on Smart Trends in Computing and Communications (SmartCom 2026), Pune, India

Publisher: Springer Nature

Accepted & Presented, 2026

- Designed a real-time IoT-based attendance system using RFID (RC522) and ESP32 microcontroller
- Integrated cloud-based storage via Google Sheets API for automated, secure, and tamper-proof tracking
- Prevented proxy attendance and reduced manual errors through hardware-software co-design
- Focused on scalable, cost-effective deployment for educational environments

Technical Skills

Languages	Python, Java, C++
Frameworks & Tools	Flask, React, Git, GitHub, Postman
Data & ML	Pandas, NumPy, Matplotlib, scikit-learn, NLP (spaCy)
IoT & Hardware	ESP32, RFID (RC522), Google Sheets API
Databases	MySQL, SQL
Other	Power BI, Excel, REST APIs

Experience

Data Analytics Intern – 3Skill Intern Growth (Remote)

Dec 2025 – Feb 2026

- Built Python (Pandas) and SQL pipelines to process 10,000+ records, improving data quality by 25%
- Designed Power BI dashboards to extract actionable insights and reduce reporting effort by 30%
- Automated ETL workflows for faster and more efficient data processing

Web Development Intern – Remark Skill Education × IIT Hyderabad (Remote)

Jun 2025 – Jul 2025

- Developed responsive web applications using HTML, CSS, JavaScript, and PHP
- Optimized page performance, reducing load time by 30% through targeted front-end improvements
- Enhanced user engagement through UI/UX redesigns and usability testing

Projects

EcoShieldAI – ESG Fraud Detection System

Research: NLP for Sustainability Report Analysis

- Developed an AI-based system to detect misleading ESG claims using NLP (spaCy) and ML models
- Performed text extraction from PDFs and applied anomaly detection to identify inconsistencies
- Built a full-stack application (React + Flask) for real-time analysis and visualization

Delhi Weather & AQI Analysis

Research: Data-Driven Environmental Analysis

- Analyzed environmental datasets to study pollution trends and seasonal AQI variations
- Identified key factors affecting air quality using statistical and visualization techniques

Ola Ride Data Analysis

- Analyzed large-scale transportation data using Python and SQL; built dashboards for data-driven decisions
- Conducted EDA to uncover demand trends and pricing patterns across regions

TreeForge – Automated Project Generator

- Built a Python CLI tool using Click and Jinja2 to automate project scaffolding, cutting setup time by 60%
- Designed modular architecture supporting multiple tech stacks for reusable templates

Achievements

- Ranked 12/180 teams** – Open Source Contributor Hackathon **Smart India Hackathon 2025** – Top 50
- SSIP 2025** – Phase 2 Selected **Gen AI Academy 2.0** – Gold League **HacktoberFest** – Open Source Contributor

Research Interests

- Machine Learning & Deep Learning
- Natural Language Processing (NLP)
- IoT & Embedded Systems
- AI for Social Impact (ESG, Sustainability)

Leadership & Activities

- Technical Member – CP Squad, CSPIT**
- Mentored 100+ students in Git & development
 - Conducted workshops on coding & version control

Certifications

- NPTEL: Data Structures, C++, Python (Elite + Silver)
- Coursera: Java, OOP, Web Development
- AWS: Cloud Practitioner
