Professional Summary

B.Tech IT student at CHARUSAT with hands-on experience in Machine Learning, NLP, and AI-driven systems. Published researcher at Springer SmartCom 2026 with experience in ML pipelines, classification, anomaly detection, and Flask-based deployment using Python and scikit-learn.

Education

Charotar University of Science & Technology (CHARUSAT)

Jul 2024 – May 2028

B.Tech in Information Technology

CGPA: 7.6/10

Technical Skills

ML / Data Science: scikit-learn, Pandas, NumPy, Matplotlib, NLP (spaCy, NER, text classification), EDA, feature engineering, supervised & unsupervised learning, classification, anomaly detection, model evaluation

Currently Learning: PyTorch, neural networks, deep learning fundamentals

Languages: Python, C++, Java, SQL

Frameworks / Tools: Flask, React, Git, GitHub, Postman, REST APIs

Analytics / BI: Power BI, Excel, MySQL

Projects

EcoShieldAI – AI-Powered ESG Fraud Detection System

- Built NLP classification pipeline using Python, spaCy, and scikit-learn to analyze 500+ ESG disclosures
- Evaluated Logistic Regression and Random Forest models using precision, recall, and F1-score metrics
- Deployed React + Flask dashboard for real-time ESG scoring and visualization

Delhi Weather & AQI Analysis

- Conducted EDA on 5+ years of AQI and weather datasets using Python and Pandas
- Analyzed pollution trends across 10+ monitoring stations using regression techniques

Ola Ride Data Analytics

- Processed and analyzed 100K+ ride records using Python and SQL
- Built Power BI dashboards identifying ride demand and pricing anomalies

Experience

Data Analytics Intern – 3Skill Intern Growth

Dec 2025 – Feb 2026

- Built Python and SQL pipelines processing 10,000+ records and improving data quality by 25%
- Designed Power BI dashboards reducing reporting effort by 30%
- Automated ETL workflows for efficient data processing

Research Publication

IoT-Driven RFID-Based Real-Time Attendance System

10th International Conference on Smart Trends in Computing and Communications (SmartCom 2026), Springer Nature

- Co-authored and presented research paper at SmartCom 2026 under the guidance of Dr. Aneri Pandya and Dr. Killol Pandya
- Designed and developed an IoT-enabled attendance system using ESP32 and RFID (RC522) for secure real-time authentication
- Implemented automated cloud synchronization using Google Sheets API for centralized attendance management
- Reduced proxy attendance and manual intervention through hardware-software integration and real-time validation workflows
- Focused on scalable and cost-effective deployment for smart campus environments

Achievements

- Ranked 12th among 180 teams in GDG Open Source Contributor Hackathon
- Smart India Hackathon 2025 – Top 50 Finalist
- Selected for SSIP 2025 Phase 2 and Gen AI Academy 2.0 Gold League
- HacktoberFest Open Source Contributor

Leadership & Activities

Technical Member – CP Squad, CSPIT

- Organized 3 technical workshops on Git, GitHub, and development workflows
- Coordinated 2 hackathons promoting collaborative problem-solving
- Mentored 100+ students in coding and open-source contribution

Certifications

NPTEL Python (Elite + Silver) | IIIT-H Algorithm Design | IBM Web Development | Core Java & OOP | IBM JavaScript Essentials
